

Boris Nikolić

Software Developer · Backend-focused Full-Stack (Python, Go, PostgreSQL, React)
Based in Belgrade, Serbia · Remote friendly (CET) · Looking for full-time or part-time roles with flexible working hours · B2B contractor or employee
borisnikolic2302@gmail.com · bok1c4.com · github.com/bok1c4 · linkedin.com/in/boris-nikolic-a44a2126a

SUMMARY

Backend-focused full-stack developer with four years of hands-on web development, progressing from frontend internships (2022–2023) through independent Node.js backend work (2024) to contract engineering for Fairphone (2025–present), where I build Odoo/ERP modules and data pipelines in Python and PostgreSQL. I own features end to end, from stakeholder requirements to deployment, and also write Go services and take care of the DevOps side with security in mind: hardened Linux servers, Docker, CI/CD pipelines, and monitoring.

EXPERIENCE

Software Developer (B2B contract) · Fairphone

2025 – Present

Freelance B2B · ERP engineering for supply-chain and sustainability operations.

- Built Odoo modules (Python, PostgreSQL) for sustainability and procurement teams, replacing manual, hand-kept tracking with automated workflows and reporting over large datasets.
- Designed and built replication of ERP data into analytical warehouses, with reliable delivery as the core requirement.
- Designed the architecture for a customer-facing web shop on top of Odoo: an API gateway in front of the ERP with separate frontend services.
- Worked directly with stakeholders: gathered requirements, explained technical trade-offs in plain language, and shipped tested features end to end to the production VPS.

Independent Full-Stack Developer · Self-directed

2024

Belgrade

- Moved from frontend into backend: built Node.js/Express servers and REST APIs with auth and PostgreSQL, plus the React frontends consuming them.

Frontend Developer (part-time internship) · High school partner company

2023

Zaječar

- Contributed to a production React codebase: built UI components and styling to spec.
- Prepared request data for backend APIs and handled responses and state on the frontend.
- Contributed to C# codebases on .NET in a Windows environment.

Web Development Intern (school programme) · Local team, Zaječar

2022

Alongside school

- Built and styled websites in HTML and CSS.

PROJECTS

E-commerce platform

Go, Gin, Next.js, PostgreSQL, Redis, Stripe, Nginx, Docker Compose

- Go (Gin) backend with dual-token JWT auth and revocable refresh tokens.
- Two-step Stripe PaymentIntent checkout, order line-item snapshots, and an admin dashboard.
- Cache-aside Redis catalog that degrades gracefully; Nginx and Docker Compose in front.

github.com/bok1c4/toy_store

Systems & networking in C/C++

C, C++, POSIX sockets, AES-256-GCM, GPG

- Multi-client HTTP server built from POSIX sockets up.
- Multi-hop HTTP forward proxy with layered encryption (in progress).
- Terminal password manager with per-secret hybrid encryption (AES-256-GCM, GPG).

github.com/bok1c4/HTTP-Proxy

Order & revenue management platform

Go, Next.js, TypeScript, PostgreSQL

- Multi-role web application with role-based access control.
- Order management, revenue reporting, and notifications.

RPG campaign manager

Java 21, Spring Boot 3, JWT, React

- REST API with JWT access and refresh tokens and role-based authorization.
- React single-page frontend consuming the API.

github.com/bok1c4/rpg-campaign-manager

SKILLS

- Languages:** Python, Go, TypeScript/Javascript, SQL, C/C++; working knowledge of Java (Spring Boot), PHP (Laravel), C# (.NET)
- Backend:** Odoo module development, Go (Gin, chi), Node.js (Express, NestJS), REST API design, JWT auth & RBAC, Stripe
- Data:** PostgreSQL, Redis, ERP data replication, Query optimization, RabbitMQ, Scheduled jobs
- Frontend:** React, Next.js, Angular, Tailwind CSS, Redux Toolkit
- Ops:** Linux, Docker/Compose, Nginx, GitHub Actions, GitLab CI, Prometheus, Grafana
- Also:** AI-assisted development (Claude Code, Codex), Motion & graphic design

EDUCATION

BSc Software Engineering · Singidunum University, Belgrade · Expected 2027
